AI POWERED SMART MOTHERHOOD AND INFANT MONITORING SYSTEM

Digital system that helps first time mothers monitor infant growth, vaccination schedules, nutrition and child development using Ai powered assistant.

It addresses the challenges faced by first time mothers in monitoring infant growth, vaccination schedules, nutrition, behavior and healthcare records after birth.

Mothers still uses manual health booklet and limited medical guidance as a results important infant growth, vaccination schedules may be missed.

Existing systems fail to provide a complete digital health care support platform for maternal and infant care

It reduces paper work

Mothers often fail to track development milestone and lack of reliable parenting regarding nutrition growth and child behavior

Existing application mainly focus on single functions e.g., vaccination remainders and do not provide an integrated platform for child development monitoring, AI assisted health care support, digital medical records and medical guidance in one system

Hybrid Approach

Digital system supports healthcare services

Paper records are still maintained for legal backups and transition progress it doesn't replace paper work it works together with the existing paper based to ensure smoothy adoption reliability

ARCHITECTURAL DESIGN

The application should contains

Dashboard,Child profile,medical records ,appointments,maternal health, child development/growth stages, Ai assistance, vaccination and reminders,

Ai assistace chat bot

Smart vaccination prediction system

Baby development intelligence eg weight,height,speech and etc

Emergency detection feature

Voice support in local languages

Digital mother journal

Doctor/nurse portal

Mother module

Add Child health history Timeline

Multi child support incase a mother gave birth to twins or more

Secure medical data protection since it handles sensitive child data

Analytics dashboard shows eg completion of vaccination completion rate

QR code each child get a code scan at the hospital

Community education section eg parenting tips, hygiene education

Smart growth chart shows eg height curve , weight curve, BMI trend

Sms notification

Backup and recovery system

Hospital integration
